**Subject:** Sprague Energy Corp Section 114 Testing Order  
**Categories:** Folder: ~SENT

Hi folks,

I'm sending a copy of a CAA Section 114 testing Order that EPA is issuing to Sprague Energy Corp. The Testing Order requires Sprague to sample the headspace of a #6 oil tank and an asphalt tank for VOC and HAP emissions. Sprague has several facilities located throughout New England and the test facility has not yet been decided. Once Sprague has decided where the headspace sampling will take place, the appropriate state agency should be notified as part of the test requirement. Please feel free to contact me if you have any questions.

Beth
